## Summary

Hi, I'm Jackson. I'm a software engineer with 5 years of experience creating web applications using modern JavaScript frameworks.

## Experience

### Software Engineer

Aleo

May 2021 - Present (9 months +)

Aleo is a startup creating Zero-Knowledge Applications using Blockchain technologies.

As a software engineer at Aleo, I:

- Work closely with the Design team to implement the frontend using React.js and/or Next.js.
- Was responsible for creating and maintaining our component library.
- Successfully launched the Setup Ceremony for the Browser, which took advantage of WebAssembly.

### Software Engineer

Apago, Inc.

Oct 2017 - May 2021 (3 years 8 months)

Apago is a software contracting firm. We build solutions for a variety of different customers of all sizes.

As a software engineer at Apago, I:

- Worked with the customer and my boss to plan and design the end product.
- Managed my own time and process
- Implemented the product using my choice of technology (I have worked with Angular, React, and Vue)

## Education

### Digital Crafts Full Stack Bootcamp

Certified Mean Stack and Python Stack Developer

2016 - 2016

During the 3 month web development course at DigitalCrafts, we learned all aspects of the modern web. We started with basic HTML, CSS, and JavaScript and then moved on to frameworks such as Angular and Express. I also participated in a UI/UX Elective, which taught me the fundamentals of user experience and design as well as tools such as Sketch.

## Skills

Software Development • Front-End Development • React.js • Node.js • SASS • TypeScript • Next.js • PostgreSQL • Git • Agile Methodologies
